

Hello Skippers,

I have received the score sheets from Chuck and have compiled the results into the season spreadsheet. The results from the regatta are shown below and the spreadsheet is attached.

I received this report from Stew (Thanks!!) about the overall sailing:

Briefly, we had 6 skippers come out for the day. The weather was sunny and warm but for most of the 15 races we had very stiff winds out of the west, south west of 10- 15 mph with some gusts greater than 20. We all struggled to come about into the wind when the gusts hit and the downwind leg saw lots of submarining. Very exciting at times and educational. All the boats took on water and needed emptying after each race. Fortunately, no boats broke or sank. Am not sure what went wrong with Chuck's boat. I think he told me his winch drum screw came out and he had no winch. All in all, a good time was had by all.

See you at the pond,

Don
